Response to Amendment

Page 2

1. Claims 21-35, 37-44 and 46-57 are allowed.

2. This application is in condition for allowance except for the presence of claims 1-

20 to an invention non-elected with traverse in the reply filed on July 19, 2005.

Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever

is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144).

Failure to take action during this period will be treated as authorization to cancel the

noted claims by Examiner's Amendment and pass the case to issue. Extensions of time

under 37 CFR 1.136(a) will not be permitted since this application will be passed to

issue.

The prosecution of this case is closed except for consideration of the above

matter.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

US 6,160,388, "Sensing of current in a synchronous-buck power stage" issued to

Skelton et al., 12-12-2000 teaches a DC-DC converter circuitry, in which transistors 101

and 102 (fig. 1) receive drive signals from a dead time control circuit (107, fig. 1) based

Application/Control Number: 10/695,508

Art Unit: 2861

upon a pulse width modulated (PWM), or Vcont signal, the transistors 101 and 102 buffer the control signals. An input DC voltage Vin is chopped by the transistors 101 and 102 into a square wave and appears at node 105 (fig. 1). This voltage then passes through a low pass filter (constituted by 103 and 104) and becomes a lower voltage Vout.

This circuitry shown in fig. 1 is more or less like that by the instant application.

However, the Vout is converted from a Vin, and is not from the Vcont, which is a PWM control signal.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-wen Hsieh whose telephone number is 571-272-2256. The examiner can normally be reached on 7:30AM -5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S D. Meier can be reached on 571-272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
